## Market and operations

### Commercial property market

Norwegian Property estimate the office vacancy in Oslo at 6.1 per cent overall and 5.2 per cent in the city centre. Moderate vacancy rates in the past few years have contributed to positive trends for rents. Office vacancy at Fornebu is 7.4 per cent. The level of activity in the transaction market has been high for several years, with many properties changing hands in various segments at strong yield levels. Prime yield for the Oslo CBD is estimated to be about 3.25 per cent.

Access to financing, especially in the NOK bond market, was very good in the third quarter. Loan margins in the bond market are at low levels, and large transactions have been executed.

The 10-year swap interest rate has varied between 1.35 per cent in July and 1.88 per cent at the end of September. The US economy has improved the last months, inflation has risen, and the Fed is aiming at starting tapering in November. The 10 year USD swap rate has increased, and the NOK rate has increased accordingly. Risk regarding the COVID-19 pandemic seems to be lower now as society is opening up and activity is getting close to normal.

Hence, increasing the degree of waste sorting is an important

measure. The project includes, among other things, the following initiatives:

- Updated information to all tenants at Aker Brygge about how to sort waste.
- Together with our tenant, BNP, arranging a Green Week with focus on waste.
- Staffing of waste rooms to assist with the sorting.
- In collaboration with tenants and the garbage removal company, work has been done to improve signs and equipment to ease waste sorting. A new labelling scheme with new symbols and colours will be introduced and implemented for all properties.

### Shareholder information

In July 2021, Geveran Trading Co. Ltd. (Geveran) acquired shares equalling more than 90 per cent of the shares in Norwegian Property ASA. In August 2021, Geveran carried out a compulsory acquisition of all the

## NOTE 8: Financial instruments

Total financial liabilities	12,484.7	12,511.8	7,864.0	7,974.0	12,516.1	12,544.7

The estimated fair value of financial instruments is based on market prices and valuation methods. For cash and cash equivalents, fair value is assumed to be equal to the book value.

Interest-bearing receivables and liabilities are measured at the present value of future cash flows. Account is taken of the estimated difference between the current margin and market conditions (market value higher than the book value of debt in the listing indicates a negative equity effect when the applicable borrowing margin is less favourable than current market conditions).

The fair value of financial derivatives (interest-rate and currency derivatives) is the estimated present value of future cash flows which is calculated by using quoted swap curves and exchange rates as at the balance sheet date. The technical calculations are performed by the banks.

Other receivables and other current liabilities are carried principally at fair value and subsequently measured at amortised cost. However, discounting is not usually considered to have any significant effect on these types of assets and liabilities.

Financial instruments at fair value through profit or loss are specified in the table below by the valuation method.

## EPRA Performance Measures

EPRA (European Public Real Estate Association) is an association for the publicly traded European real estate sector. EPRA was founded in 1999 as a not-for-profit association. It has more than 275 members, covering the whole spectrum of the listed real estate industry (companies, investors and their suppliers). EPRA's mission is to promote, develop and represent the European public real estate sector through the provision of better information to investors and stakeholders, active involvement in the public and political debate, promotion of best practices as well as the cohesion and strengthening of the industry. For further information, see [www.epra.com](http://www.epra.com).

EPRA has issued Best Practices Recommendations Guidelines on areas of reporting that are the most relevant to investors and where more consistent reporting across Europe would bring the greatest benefits in the overall transparency of the sector. With effect from the third quarter report for 2021, Norwegian Property will report on the following EPRA Performance Measures.

### EPRA Earnings

EPRA Earnings is a key measure of the underlying operating performance of the property portfolio and an indication of the extent to which current dividend payments are supported by earnings. EPRA Earnings is calculated based on the IFRS Earnings for the commercial property portfolio adjusted for changes in the market value of investment properties, changes in the market value of financial derivative instruments and the related tax effects.

Adjustments to calculate EPRA Earnings:						
Change in market value of inv. property and rental guarantee	NOK mill.	(326.6)	(602.7)	(353.1)	(105.0)	(1,827.5)
Change in market value of financial derivative instruments	NOK mill.	(45.8)	(133.2)	(14.7)	192.2	101.6
Share of profit from JVs <sup>1</sup>	NOK mill.	11.3	(44.3)	13.0	13.0	0.4
Income tax	NOK mill.	103.5	171.4	76.9	(3.1)	298.9
EPRA earnings	NOK mill.	68.6	227.8	64.1	168.2	249.3
Average outstanding shares (million)	Mill. shares	643.6	643.6	533.9	507.1	535.5
EPRA Earnings per share	NOK	0.11	0.35	0.12	0.33	0.47

<sup>1</sup> Earnings from the Nordr joint venture (JV) are adjusted for as it is related to the development of residential properties for sale, and they are not relevant for the measurement of the performance of the commercial property portfolio.

### EPRA NAV Metrics

The EPRA NAV set of metrics make adjustments to the NAV per the IFRS financial statements to provide stakeholders with the most relevant information on the fair value of the assets and liabilities of a real estate investment company, under different scenarios.

#### EPRA Net Reinstatement Value (NRV)

The EPRA NRV metric assumes that entities never sell assets and it aims to represent the value required to rebuild the entity.

Investments in JVs are revalued based on an estimated fair value of such investments. The fair value on financial derivatives and deferred taxes on investment properties are excluded. Property transfer taxes do not normally apply to Norwegian transactions, and therefore such taxes are not included in the NRV calculation. The fair value of financial instruments, which are used for hedging purposes where the company has the intention of keeping the hedge position until the end of the contractual duration, is excluded. Under normal circumstances, the financial derivatives that companies use to provide an economic hedge are held until maturity and so any fair value movements will not crystallise.

EPRA Net Reinstatement Value (NRV)		3Q-21	3Q-20	4Q-20
IFRS equity	NOK mill.	12,185.1	9,384.4	11,560.9
Revaluation of investments made in JVs	NOK mill.	1,185.0	-	928.4
Net Asset Value (NAV) at fair value	NOK mill.	13,370.1	9,384.4	12,489.3
Deferred tax on properties and financial instruments	NOK mill.	1,896.8	1,311.0	1,668.9
Net fair value on financial derivatives	NOK mill.	43.9	267.7	177.1
Net Reinstatement Value (NRV)	NOK mill.	15,310.7	10,963.1	14,335.2
Outstanding shares at period end (million)	Mill. shares	643.6	591.1	643.6
NRV per share (NOK)	NOK	23.79	18.55	22.27

### EPRA Net Tangible Assets (NTA)

The EPRA NTA metric assumes that entities buy and sell assets, thereby crystallising certain levels of unavoidable deferred tax.

Investments in JVs are revalued based on an estimated fair value of such investments. Norwegian Property has adopted the second option in the EPRA BPR guidelines to adjust for deferred tax, estimating the real tax assets and liabilities based on how the company has previously carried out transactions and otherwise utilised existing tax positions. The fair value of financial instruments that are used for hedging purposes are excluded.

EPRA Net Tangible Assets (NTA)		3Q-21	3Q-20	4Q-20
IFRS equity	NOK mill.	12,185.1	9,384.4	11,560.9
Revaluation of investments made in JVs	NOK mill.	1,185.0	-	928.4
Net Asset Value (NAV) at fair value	NOK mill.	13,370.1	9,384.4	12,489.3
Reversal deferred tax liability as per balance sheet	NOK mill.	1,506.5	950.4	1,268.0
Adjustment for estimated fair value of deferred tax <sup>2</sup>	NOK mill.	192.6	286.6	205.5
Net fair value on financial derivatives	NOK mill.	43.9	267.7	177.1
Net Tangible Assets (NTA)	NOK mill.	15,113.0	10,889.0	14,139.9
Outstanding shares at period end (million)	Mill. shares	643.6	591.1	643.6
NTA per share (NOK)	NOK	23.48	18.42	21.97

<sup>2</sup> Estimated fair value of deferred taxes where the estimated fair value of the tax asset related to carry-forward losses are greater than the estimated fair value of relevant tax liabilities. The calculations assume that carry-forward losses can be utilised over the next 5 years with a discount rate of 5 per cent. The real tax liability related to the gains/losses accounts is estimated on the basis of the annually depreciation rates in the Norwegian tax legislation and a discount rate of 5 per cent. The estimated fair value of the deferred tax liability related to the temporary differences of properties as at 30 September 2021 has been calculated to 3.6 per cent based on a discount rate of 5 per cent and the assumption that properties outside Aker Brygge are realised over the next 50 years period in transactions structured as sale of companies in which the tax discount is 5.6 per cent.

### EPRA Net Disposal Value (NDV)

The EPRA NDV metric represents the shareholders' value under a disposal scenario, where deferred tax, financial instruments and certain other adjustments are calculated to the full extent of their liability, net of any resulting tax.

Investments in JVs are revalued based on an estimated fair value of such investments. Financial liabilities are valued at the estimated fair value, net of deferred tax.

EPRA Net Disposal Value (NDV)		3Q-21	3Q-20	4Q-20

## EPRA Net Initial Yield

### EPRA Net Initial Yield (NIY) and EPRA "Topped-up" NIY

The EPRA Net Initial Yield metrics presents annualised rental income based on the cash rents passing at the balance sheet date, less non-recoverable property operating expenses, divided by the market value of the property and increased with estimated purchasers' costs. The EPRA NIY is a comparable measure for portfolio valuations.

The EPRA "Topped-up" NIY metric incorporates an adjustment to the EPRA NIY in respect of the expiration of rent-free periods or other unexpired lease incentives such as discounted rent periods and step rents.

NAV (Net Asset Value) is the book value of total equity in the balance sheet.

Adjusted NAV is the NAV from an ordinary long-term operational perspective of the business. Based on total equity in the balance sheet, adjustments are made for the carrying amount of deferred tax related to the fair value adjustments of investment properties and for the fair value of financial instruments after tax in the balance sheet.

In relation to the Adjusted NAV, NNNAV (triple net asset value) includes estimated realisable fair values at the balance sheet date for deferred taxes, financial instruments and liabilities.
